ABOUT ME

Hi, I am a designer, developer, product manager and business analyst. I have 18 years experience developing technology solutions and improving business processes. I am a problem solver who thrives on a good challenge. My passion is creating solutions that leverage technology to solve business needs.

I am comfortable giving presentations to executives, developing technology strategy, wrangling code, designing application interfaces, managing complex projects with tight deadlines or hashing out the intricate details of RegB, TRID or HMDA to insure mortgage operations stay compliant. I have worked many positions in the mortgage industry along with developing software and this has given me the skills needed to craft solutions that make people's lives easier and bring financial success to the companies I have worked for.

- Resourceful

WORK EXPERIENCE

Caliber Home Loans, Inc.
Technology Strategy / 2016 – 2019

Provided vision, direction, coordination, implementation and execution of wide range of applications. Developed programs, policies, procedures, reference/training material and communications to support technology projects. Launched 3 native mobile apps providing staff, borrowers and partners access to real-time data and critical functionality. Redesigned our online loan application process and web portal to streamline the workflow, increase data collection and improve engagement.

First Priority Financial, Inc.
Senior Software Engineer / 2015 – 2016

Managed our Information Technology team that included: network administration, application development, project management, user support, technology purchasing, information security and disaster recovery planning. Worked hands on in day to day administration of our Encompass LOS. Including business rules, custom forms, workflow, reporting and custom programming. Developed a custom rate sheet publishing platform. Streamlined secondary bulk bidding, sale and data transfers. Developed a custom companywide compliance error tracking and resolution system. Greatly reducing compliance errors.

SquaredBits, Inc.
Software Engineer / 2009 - 2015

Provided custom application development, web design, project planning and business analysis/strategy. Managed all aspects of the LOS software, Encompass 360. Including business rules, custom forms, workflow, reporting and programming. Migrated a mortgage lender from their custom LOS to Encompass. Converted a mortgage lender to a near paperless process. Provided in-person training and custom training materials to assist in the migrations.
